Subject: Phasing out black Side++ profiles (7017...ZW) and connector (724863ZW)

Dear customer,

In this product update we would like to inform you that from July 1, we shall be removing the black-coated Side++ profiles (7017...ZW) and the associated connector (724863ZW) from the standard delivery programme. The reason for this change is the low level of demand for black profiles that has been evident for some time: installers tend to choose the standard aluminium-coloured mounting profiles because they are practically invisible in the PV installation.

This means that, after the current stock is finished, no more black Side++ profiles and connectors will be kept in stock.

Side++ in black

The overview below specifies the black Side++ profile lengths that will soon no longer be available.

| Article number | Description | Image |
|----------------|--|-------|
| 701701122ZW | Alu. Side++ profile L=1122 mm (extra long) - Black | |
| 701702185ZW | Alu. Side++ profile L=2185 mm (extra long) - Black | |
| 701703248ZW | Alu. Side++ profile L=3248 mm (extra long) - Black | |
| 701704311ZW | Alu. Side++ profile L=4311 mm (extra long) - Black | |
| 701705374ZW | Alu. Side++ profile L=5374 mm (extra long) - Black | |
| 701706437ZW | Alu. Side++ profile L=6437 mm (extra long) - Black | |

The profile highlighted in blue will remain available for ordering, but only in complete packages with 2 m lengths (of 84 profiles). The delivery time will continue to be the standard 4-6 weeks.

ValkPVplanner

From July 1 the ValkPVplanner will contain only the standard aluminium-coloured Side++ profiles, which will be added to the list of materials.

We trust that this is sufficient information for your purposes. If you have any questions or comments, please do not hesitate to contact us.

Best regards.
